# ON A JOURNEY TO MAKE SUSTAINABILITY THE NEW NORMAL

## WHAT MAKES A MARC O'POLO HOME PRODUCT SUSTAINABLE?

Our aim is to only offer products in the future that are made primarily from materials that promote our environmental responsibility. We consider products to be sustainable if their main components or extraction and production are in line with our commitment to sustainability. In some cases, however, specific product requirements or the availability of alternatives that meet our environmental awareness pose a challenge to achieving full sustainability. In such cases, we leave minimal room for compromise in order to prioritise product quality while making responsible choices.

## SUSTAINABLE MATERIALS

Marc O'Polo was founded in 1967 on the idea of choosing natural materials first and foremost and only using synthetic materials when absolute necessary. We source the majority of natural materials like cotton from responsible sources (e.g. organic cotton) and there are now more sustainable, eco-friendlier versions of some synthetic materials, such as recycled polyester or regenerated cellulose fibres from natural raw materials.

## ORGANICALLY GROWN FIBRES

Organic products contain fibres that are grown and obtained without synthetic pesticides, defoliants or chemical fertilisers and free from GMOs in accordance with the principles of organic farming. All of the Marc O'Polo Home products with organically grown fibres are certified in accordance with international standards such as Global Organic Textile Standard (GOTS) or Organic Content Standard (OCS).

## SUSTAINABLE REGENERATED FIBRES / TENCEL™ LYOCCELL

Marc O'Polo Home uses regenerated fibres like Tencel™ Lyocell, a cellulose fiber sourced from sustainable forestry. Strictly adhere to rigorous environmental standards. They prioritize responsible wood pulp extraction, ensuring that trees are sourced from certified and controlled wood sources. This approach promotes sustainable forestry practices, preserving our planet's vital ecosystems and biodiversity.

## RECYCLED MATERIALS

Fibres from recycled material save natural resources. Marc O'Polo Home uses recycled cotton fibres, recycled wool and cashmere, mainly from pre-consumer material, and recycled polyester fibres, which are primarily sourced from recycled PET bottles. Many of our products made with recycled materials are certified in accordance with the Recycled Claim Standard (GRS).

# CERTIFICATES

WHEN SOURCING MATERIALS, WE ARE INCREASINGLY USING INDUSTRY-RECOGNISED STANDARDS FOR ORGANIC AND RECYCLED FIBRES AS WELL AS ONES THAT TAKE LAND MANAGEMENT INTO ACCOUNT. FOR MOST STANDARDS (INCLUDING GOTS, OCS, GRS, AMONG OTHERS) INDEPENDENT THIRD PARTIES CHECK AT ALL LEVELS OF THE TEXTILE PRODUCTION CHAIN THAT THE CORRESPONDING MATERIAL IS CONTAINED IN THE PRODUCT. TO ENSURE THE NECESSARY TRANSPARENCY IN THE SUPPLY CHAIN, WE ARE CONTINUOUSLY EXPANDING THE RELEVANT CERTIFICATION FOR OUR PRODUCTS. A LOGO ON THE LABEL SHOWS WHETHER A MARC O'POLO HOME PRODUCT IS CERTIFIED IN ACCORDANCE WITH A PARTICULAR STANDARD. MORE AND MORE OF OUR PRODUCTS AND MATERIALS ARE CERTIFIED.

## GLOBAL ORGANIC TEXTILE STANDARD (GOTS)

Products that comply with the Global Organic Textile Standard (GOTS) must be made from a high proportion of organic natural fibres. GOTS also places strict requirements on the ingredients and production processes used and requires compliance with social and environmental criteria during further processing.

GOTS ORGANIC MINIMUM 95 PER CENT ORGANIC NATURAL FIBRES  
GOTS MADE WITH ORGANIC 70–94 PER CENT ORGANIC NATURAL FIBRES

## ORGANIC CONTENT STANDARD (OCS)

The Organic Content Standard (OCS) applies to products that contain 5 to 100 per cent organic material.

OCS 100 MINIMUM 95 PER CENT ORGANIC NATURAL FIBRES\*  
OCS BLENDED 5 TO 95 PER CENT ORGANIC NATURAL FIBRES\*

## GLOBAL RECYCLED STANDARD (GRS)

The Global Recycled Standard (GRS) is a voluntary product standard for tracking and verifying the content of recycled materials in a final product. The standard applies to the full supply chain and addresses traceability, environmental principles, social requirements, chemical content, and labeling.
